Index 1978

SUBJECT

Alcohol
  analysis of wine, 87
  a problem in Tanzania, 112
Alkenes
  polymerisation experiment, 90
  rate of hydrolysis experiment, 91
Ammonia, production of, 114
Analysis, differential method of titrimetric, 148
Audio-visual
  electrochemistry course, 109
  student evaluation of UTOPIA, 84
Ausubel, use to teachers, 120

Books
  antibiotics, 163
  bio-inorganic chemistry, 65
  case studies, 159
  chelation, 96
  coordination chemistry, 159
  crosswords, a learning aid, 31
  crystallography, 65, 158
  elementary science, 163
  energy, 160
    fuel cells, 65
  environment, 130
  exercises, for A-level, 95
  experiments, a source book, 130
  fuel cells, 65
  games, 193
  industry, the acetic acid process, 159
  inorganic chemistry, 96, 157, 159
  laboratories, 160
  mass spectrometry, 95
  mathematics, modern, 158
  nmr, 193
  Nuffield, teacher's guide to, 158
  organic chemistry, 96, 130, 157, 160, 193, 194
  origins, 193
  physical chemistry, 157, 158
  proteins, 157
  quantum chemistry, 159
  questions, in A-level chemistry 31, 129
  safety, a source book, 30
    uv radiation, 194
  science education, Loughborough symposium, 163
    project orientation in, 31
    research in Europe, 96
  textbooks, 95, 130, 160, 193, 194
  writing, 193

Chemical equilibria in 3D, 56
Chemical structure analysis, 146
Chemists on stamps, 53
Conundrums, chemical, 146
Cosmochemistry, 182
Crystallography, 126
  drawing polyhedra, 152
CSE, a chemistry course, 143

Drawing polyhedra, 152

Electron pairs, stability of, 186
Elements, origin of, 182
Energy
  atomic, 18
  fossil fuel, 24
  from wood, 82
  fuel cells, 27
  solar, 8
  synthetic fuels, 21
  tides, 15
  wind, 12
Entropy, conundrums, 146
Equilibria, chemical in 3D, 56
Experiments
  analysis of wine, 87
  diffusion, 45
  hydrolysis of alkenes, 91
  polymerisation of alkenes, 90
  respiration, 180
  titrimetric analysis, 148

Film reviews, 131

Gas warfare, and science education, 175

Industry
  a university exercise, 124
  dictionary of programmed visits, 118
  working in, 93
Integrated science, 117

Link scheme, 118

Models
  chemical equilibria in 3D, 56
  turnstile rotation, 94
Molecular particles, confusion with substances, 144

Nickel, the production of, 62
Nitric acid, production of, 116
Nitrogen, industrial processes, 114

Organic compounds, reduction of, 154
Organosilicon compounds, 50

Piaget
  alternatives to, 120
  and school chemistry—a critique, 84
  defence of, 150
pλ scale, 192
Pollution, air, 110
Practical work, a review of, 178

Reduction of organic compounds, 154

Safety
  chemical mixtures, 58
  general, 69, 99, 108, 166
  incompatible chemicals, 58
School chemistry, future of, 190
SCISP, 117
Silicon, 48
Stamps, chemists on, 53
Stratosphere, chemistry and pollution of the, 110
Substances, confusion with molecular particles, 144

Technical writing, 185
Turnstile rotation, a molecular model, 94

UTOPIA, student evaluation of, 84

Wood, chemicals from, 79

X-ray diffraction, 126

AUTHOR

Abel, E., 48
Andrew, S. P. S., 114
Atkinson, G. F., 178

Ball, E. F., 124
Berry, R. W. H., 94
Binns, M. J., 143
Blues, E. T., 90
Bretherick, L., 58
Briggs, J. G. R., 122

Carswell, D. J., 84
Chambers, C., 118
Chappell, P. J., 146
Childs, P. E., 79
Cox, P. J., 192

Dawson, C. J., 120
Derewlany, L., 45
Donovan, R. J., 110
Duke, B. J., 186

Fergusson, J. F., 182
Flintham, A. J., 175
Fowles, G. W. A., 89

Guy, J. J., 126

Haddad, P. R., 87
Hall, D. O., 8
Hoppé, J. I., 94
Hudson, M. J., 90
Huxley, J. V., 62

Irina, J., 152

Jenkins, E. W., 85
Jones, A. V., 117

King, K. J., 90

Laslett, R. L., 93

McAuliffe, C. A., 21, 24
Morelli, B., 148
Moskovits, M., 45
Murton, K. J., 124

Norman, R. O. C., 154

Patrick, M. A., 12, 15
Pearson, M., 84
Pritchard, D. R., 91

Selinger, B., 146
Selley, N. J., 144
Shayer, M., 150
Sheridan, P., 109
Spencer, M., 190
Sterns, M., 87
Stott, P. A., 180
Switzer, W. L., 185

Truman, R. B., 56
